Title: Tetris on Android

Description: Build the game of tetris on Android.

Platform/Environment: Android

Programming Languages: Java

Functionality:

- Create a basic main menu

- Local/Online Highscores page

- A setting page for adjusting volume and turning on/off tutorial

- A tutorial teaching the user how to play

- The tetris game page featuring all the basic features of Tetris and complex features including holding block, soft/hard drops, and hopefully T-spins.
